UNIVERSITY CAMPUS IN LAMEZIA TERME

Promoter Authority: Municipality of Rome

Architects:
Coordination: A. Anselmi, F. Cellini, G. Ciucci, T. Giura Longo, G. Piccinato, V. Quilici
Team: M. Canciani, M. Furnari, M. Petrangeli with: L. Guglielmi

Within an urban sector of big strategic importance, other possible uses of the Mercati Generali – a complex built in the early 20th century to provide the new capital city of the Empire with the necessary equipment – are being analysed. There are two sectors to the complex involved in the project. The one occupied by the historic pavilion is designed for shopping spaces, public services and district offices, while the other one hosts the new buildings of the Roma Tre University.

The area designed for teaching in particular is made of two bodies – a two-floor plate hosts the laboratories, while a high double blade goes to department offices.

The outer building, a few historic roofs and water reservoirs are kept and included in the project to conclude the new intervention.

A tree-lined road accessible from Via Ostiense connects the two intervention areas and is open to collective use.

Chronology:
- December 1999 Agreement between the Municipality of Rome and the University of Roma Tre
- December 2000 project
